

Capstone Project Document - Guidelines

Capstone Project Report

As part of the Program, a learner has to undertake a Capstone Project in an area of their Elective (Specialization) and submit a report. The Capstone Project provides an opportunity for the students to apply classroom learning and experiment it practically. This project has been undertaken by a learner as an independent and individual study.

General Guidelines

- The project may be a descriptive study, empirical or exploratory one. Project topics are provided to assist the learner with a better understanding of areas of specialization.
- Learners must ensure that the project undertaken is an original study.
- The project can be based on either primary data or secondary data depending on the relevance of the study.
- A learner should upload a synopsis of the capstone project as per the timeline given in the Calendar of Events. The format of the synopsis is provided in Annexure– 1.
- A learner should upload an Interim Report (PDF file) on the research methodology as per the timeline given in the Calendar of Events. The format of the Interim report is provided in Annexure - 2
- A learner should Upload a five-minute video presentation of the project in the format provided in Annexure – 3
- The Capstone Project report should be uploaded in the prescribed format as per Annexure – 4
- After completing the report, the learner should check the plagiarism and attach the summary of the plagiarism report in the Project report at the end as per Annexure 5. The similarity index permitted is 20%, beyond 20% of the similarity index the project will not be considered for evaluation.
- It is mandatory to provide references for any external data/ articles/ websites/ books/ journals etc. that have been used in the project. The references have to be provided in APA format.

Assessment

Assessment of performance in the Capstone Project is based on:

1. Project Synopsis (Weightage 15%)
2. Interim Report (Weightage 15%)
3. Five-minute Video presentation on the project (The video should focus on the Objectives, Methodology, Project Outcomes, and Learning Aspects) (Weightage 20%)
4. Report Evaluation (Weightage 50%)

The assessment of the Capstone Project report will be according to predefined Rubrics based on performance indicators like Relevance of the study undertaken, Similarity Check (Plagiarism), Quality of References, Continuity of Work, Attainment of Learning Outcomes, and Overall Quality in terms of the potential of Publishing/ Patenting.

The learner has to upload the Capstone Project report on the platform in respective file format (Synopsis, Interim, Final in PDF and Video Presentation in MP4 format) as per the due date.

A learner shall be declared to have passed in Capstone Project if he/she secures a minimum of 40% marks in aggregate (Project Synopsis, Interim Report, Report Evaluation and Five-minute video presentation).

Rejection of the Capstone Project Report

A report can be rejected on the following grounds:

- If it is found that it is not an original work of the learner.
- If the data used is inaccurate or outdated.
- If the analysis is incorrect.
- If the format used is not as per University guidelines.
- If the timelines are not met by the learner.
- If the similarity index is beyond 20%.

Capstone Project Journey

For effective research study and proper utilization of time, it is advised that the learner follows the following schedule and timeline:

Week No.	Activity
1	Finalization of Title
2	Initial working and Submission of Synopsis
3	Mid Review and Interim Report Submission
4	Final Report Validation and Submission

Annexure 1: Synopsis Format Project Synopsis (weightage 15%)

- **Title**

- State the title/headline that is associated with your project objective.

- **Problem Statement (200 words)**

- Introduce and then elaborate on the problem statement.

- **Goals and objectives (2 or more objectives)**

- Clear articulation of the project's overall goals and specific objectives.
- Alignment of goals and objectives with the identified problem statement.

- **Key Features / Expected Results (500 words)**

- Identification and description of key features, requirements or functionalities to be implemented.
- Alignment of expected results with the stated goals and objectives.

- **Preliminary Findings on the likely AWS services to be used(200 words)**

- Conduct the preliminary research aimed at identifying the most suitable AWS services /offerings that would support this project's requirements.
- Explain the reasoning behind choosing these specific AWS services.

Annexure 2: Interim Report (Weightage 15%)

Interim report should consists of the following

- Executive Summary
- List of Tables (if any)
- List of Graphs (if any)
- Chapter 1: Introduction
- Chapter 2: Literature Review
- Chapter 3: Solution Architecture
- References
- Annexures

Annexure 3: Video Presentation Format (Weightage 20%)

A 5-minute video presentation of the project covering the following points should be uploaded on portal:

Video Guidelines:

- The demo video should be a screen recording of your cloud capstone project in action.
- The video should have a maximum duration of 5 minutes. Please ensure your demonstration fits within this time limit.
- Make sure the video resolution is clear and easily viewable.
- Avoid background noise and ensure your narration is audible.

Video Content:

- Start the video with a brief introduction, mentioning your name, USN and the project title.
- Provide a brief overview of the problem statement and objectives of your cloud capstone project.
- Clearly show the login process, including entering your login ID and relevant credentials (if applicable). The AWS login ID should be clearly captured.

- Demonstrate the step-by-step live working of your project's features, the functionality of each component clearly.
- Showcase of AWS services utilized in the project via Architecture Diagram
- Conclusion and Future Recommendations

Annexure 4: Report Format Project Report (Weightage 50%)

The Capstone Project report should be between 45 – 65 typed pages. An indicative number of pages for each chapter is given below for your reference. The Project Report Must be uploaded on the portal.

- Executive Summary
- List of Tables (if any)
- List of Graphs (if any)
- Chapter 1: Introduction
- Chapter 2: Literature Review
- Chapter 3: Methodology
- Chapter 4: Results and Discussion
- Chapter 5: Conclusion
- References
- Annexures (if any)

INTRODUCTION

- Background information - Provide the background information of the project
- Goals and objectives
- Key Requirements of the project

LITERATURE REVIEW

- Technology stack chosen
- Briefly describe the problems addressed by using the said stack
- AWS Services chosen - significance and reason for choosing the said AWS services

METHODOLOGY

- Requirement Analysis
- Technology Selection
- Design Phase

- Solution Architecture
- Implementation

RESULTS AND DISCUSSION

- How the stack chosen and AWS architecture curated is achieving the objectives.
- Business and Technical Challenges:
- Effort & Cost Impact (Actual vs Planned)

CONCLUSION

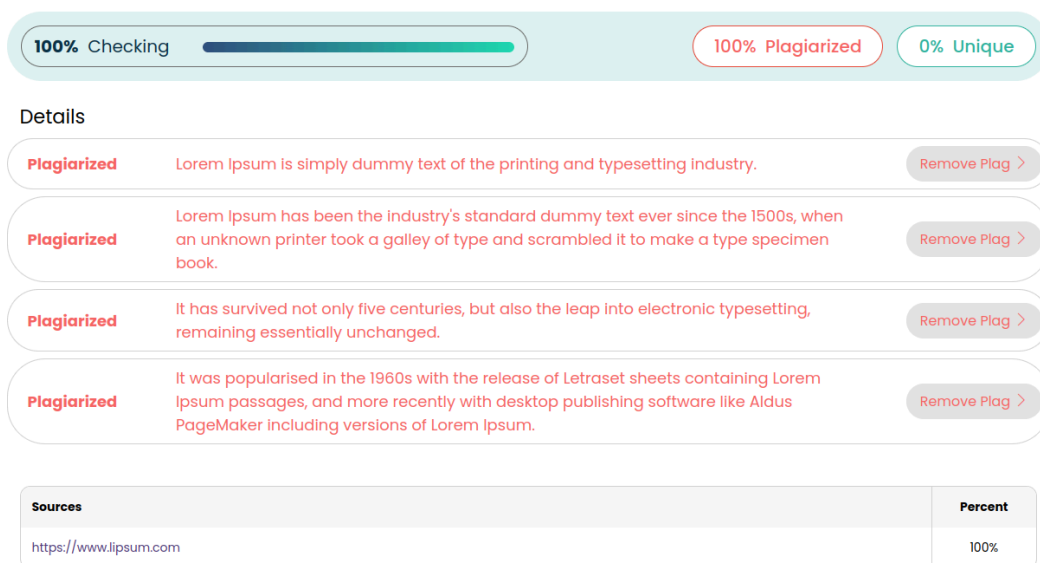

REFERENCE

Format to be followed for the Report

There should be consistency of style in terms of margins, page numbers, paragraphs, bulleted lists, numbered lists, the font used in headings, and so on.

- Margins: Left 25mm (1”), Top 25mm (1”), Right 25mm (1”), Bottom 25mm (1”)
- Font: Times New Roman
- Font Size: 14 points for Headings (boldface) and 12 points for body text
- Text Alignment: Centre for Heading and Justified for body text
- Line Spacing: 1.5
- Page Number: At the Bottom in the Middle of the Page (Start Page Number from the Main Section)
- Figures and Tables – Centered placed. Titles and Headings used for tables, graphs and other illustrations should be standardized and also be numbered sequentially.

Annexure 5: Plagiarism Report
